

Experiment - 01

Aim $\Rightarrow$ To design an Entity-Relationship (E-R) diagram for an Indian e-commerce Platform with entities such as Customer, Product, Order, Order Item, Seller, Category, Payment, Delivery, and Address, including primary keys, composite and multi-valued attributes, weak entities, specialization, of Product and Participation constraints.

- Output :
- 1 $\Rightarrow$ Identification of entities: Customer, Product, Order Item, Seller, Category, Payment, Delivery, and Address.
 - 2 $\Rightarrow$ Identification of relationship between the entities.
 - 3 $\Rightarrow$ E-R diagram showing Primary Keys, composite attributes, multi-valued attributes, weak entity and Product specialization.
 - 4 $\Rightarrow$ E-R diagram showing appropriate cardinalities and Participation constraints.
